FOOD & BEVERAGES

Foamed infant formula for an efficient drying process and improved instant properties.

THE APPLICATION SCOPE / PURPOSE

Baby food in powder form is used all over the world, where babies are not or not only supplied with milk through the breast. A quick, easy and accurate mixing of the powder into water is essential. The instant properties of the powder can be controlled by the drying process. **Foaming of the pre-mass leads to a more efficient drying process.** Kinematica offers solutions in the field of foaming.
