FOOD & BEVERAGES

High-quality instant coffee powder using an efficient drying process.

THE APPLICATION SCOPE / PURPOSE

Soluble coffee is a widely used product that is easy for the consumer to handle and is a natural product. The market for soluble coffee is a growing market, with increasing consumption, especially in Asia. The easy handling of the soluble coffee is a great advantage, but the aroma suffers from the powder production due to long residence times and high temperatures. **Foaming the pre-mass can make the drying process more efficient.** This is possible with equipment from Kinematica.
